

PRODUCT / MARKET MATRIX

AUTOMOTIVE COMPONENTS - GROWTH EXPORT MARKETS AND PRODUCTS: 2016 – 2020

The aim of the Product/ Market Matrix report is to identify further export opportunities for the South African automotive industry based on a detailed analysis of growth products and growth markets over a five-year period.

PRODUCT/MARKET MATRIX 2016 – 2020

The Covid-19 outbreak in 2020 had a direct impact on the global economy through the trade channel and brought a sharp slowdown in global trade as a result of the disruption of global supply chains, blockages to transport, as well as decreased international demand. As the world moves into the second year of the Covid-19 pandemic, there remain several unknowns about the future trajectory of the virus and patterns of trade.

Covid-19 has turned out to be the biggest deterrent to growth for the global automotive industry in recent times, with supply chain bottlenecks and dwindling new vehicle sales resulting in losses worth billions. The most visible effect of Covid-19 is the fact that OEMs globally produced fewer vehicles in 2020 than in 2019. After a bleak 2019, which already saw a marked decline of 5,2% in global vehicle production, and which ended 10 years of growth, global vehicle production declined by a massive 15,8% to reach 77,62 million vehicles, down from the 92,18 million units produced in 2019.

The automotive industry globally also had to operate at much lower market levels in 2020. Total global new vehicle sales contracted sharply by 12,45 million units, or 13,8%, from the 90,42 million units sold in 2019 to 77,97 million units being sold in 2020. Most markets reflected a revival in the second half of the year, but a recovery to pre-pandemic levels of output will be protracted, due to insufficient demand as consumers and businesses continue facing financial uncertainty.

The pandemic brought significant disruptions to South African trade and saw a steep decline in the export of automotive products. As an export-oriented industry, it remains essential for the domestic automotive industry to continue diversifying risk by pursuing wider geographical exposure to mitigate the impact of country or regional cyclical economic conditions. South Africa has built up an excellent track record as a reliable manufacturer and supplier of high-quality vehicles and automotive components to first world markets. However, diversification into new emerging markets is a continuing trend and underlines the automotive industry's competitiveness drive and the continuous widening of the country's traditional trading base.

The aim of the Product Market Matrix 2016 – 2020 is to identify further export opportunities for the South African automotive industry based on a detailed analysis of growth products and growth markets over a five-year period. Despite the severe impact of Covid-19, several opportunities have been identified in the report.

VEHICLE EXPORTS

Since Covid-19 has severely impacted economic activity in every region of the world, domestic vehicle exports have been significantly affected by the fall in global vehicle demand. Consequently, 2020 vehicle exports registered a massive decline of 115 804 units, or 29,9%, to 271 288 units in 2020, from the record vehicle export performance of 387 092 units in 2019.

The 271 288 left- and right-hand drive vehicles were exported to 104 country destinations around the world in 2020. Passenger car exports comprised 178 788 units, or 65,9% of the total; light commercial vehicles comprised 91 942 units, or 33,9% of the total; and medium and heavy commercial vehicles and buses comprised 558 units, or 0,2% of the total. In 2020, light vehicle (passenger cars and light commercial vehicles) exports accounted for a significant 63,9% of total domestic light vehicle production. Passenger cars comprised 238 216 units, or 56,2% of total light vehicle production of 423 907 units of which 75,1% were exported in 2021, while LCVs comprised 185 691 units, or 43,8% of the total light vehicle production, of which 49,5% were exported.

South African OEMs manufacture a broad range of vehicles, including passenger cars, light commercial vehicles, medium commercial vehicles, heavy commercial vehicles, extra-heavy commercial vehicles and buses.

Passenger car models manufactured in South Africa in 2020 included the following:

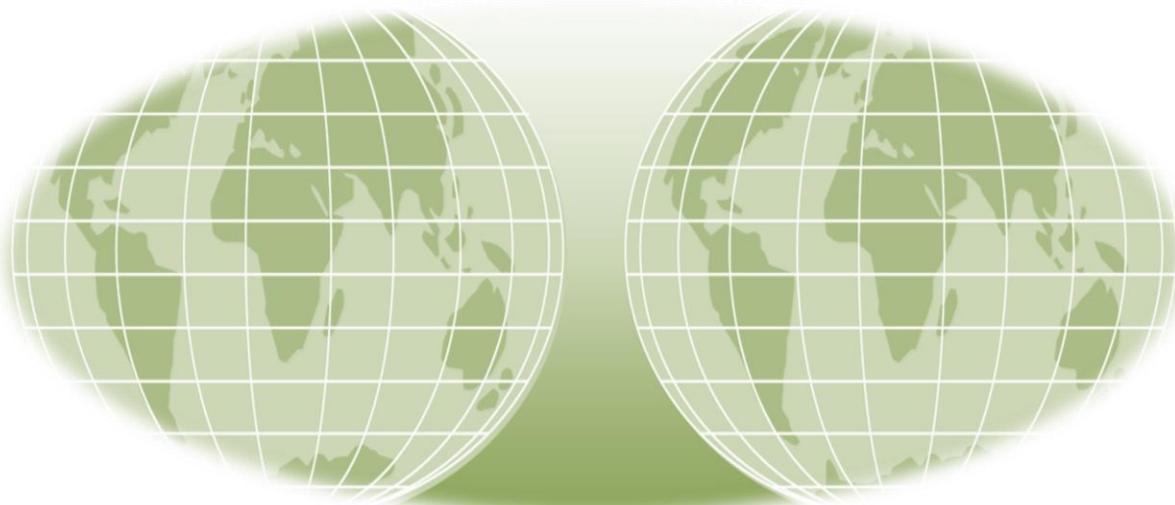

BMW	X3
FORD	Everest
Mercedes-Benz	C-Class 4-Door
Toyota	Corolla 4-door previous series (designated Quest) and Fortuner
Volkswagen	Polo, new and previous series (designated Vivo)

Light commercial vehicle models manufactured in South Africa in 2020 included the following:

Ford	Ranger
Isuzu Motors	D-Max
Nissan	NP200 and NP300 Hardbody
Toyota	Hilux and HiAce

Vehicle exports are important to the viability of the domestic automotive industry, as exporting remains key to generating sufficient economies of scale and to achieving improved international competitiveness. Significant rationalisation of the production of light vehicle models in South Africa has taken place under the MIDP and the APDP, resulting in a reduction from 42 platforms in 1995 to 11 platforms in 2020. While in 2019 two models achieved production volumes in excess of 100 000 units, no models exceeded production volumes in excess of 100 000 units in 2020, due to the impact of Covid-19 lockdown restrictions on vehicle production, sales and exports.

The following table reveals the top export destinations for passenger cars and LCVs in terms of number of units in 2020 for destinations above 500 units. The UK, Germany, Japan and France featured as the domestic automotive industry's top export destinations in 2020 while VWSA, with its Polo model, remained the pacesetter in the country's exports in 2020.

Top destinations for light vehicles (passenger cars and light commercial vehicles) exported – 2016 to 2020

Source: naamsa/Lightstone Auto, SARS

Exports of medium and heavy commercial vehicles and buses comprised only 0,2% of the total vehicle exports in 2020, which in relation to passenger cars and light commercial vehicles, has been relatively insignificant in terms of total vehicle export volumes. However, for the heavy commercial vehicle and bus sector, exports remain a priority focus in achieving higher vehicle production volumes in view of a weak domestic market.

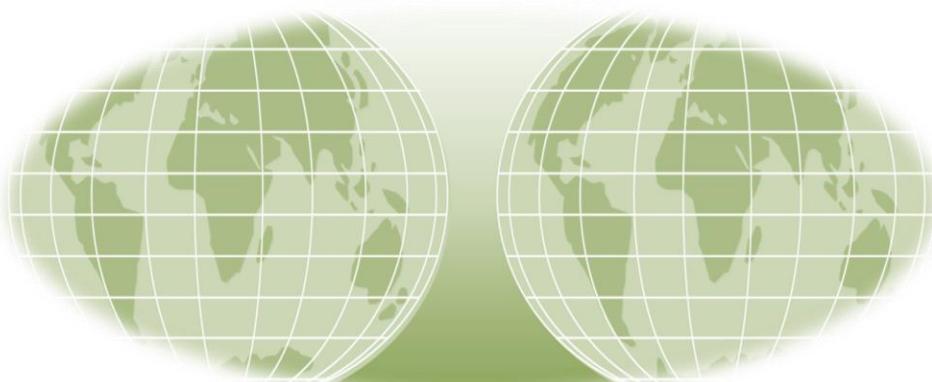

In 2020, a total of 588 trucks and buses were exported, down by 239 units, or 28,9%, from the 827 units exported in 2019. All but the medium commercial vehicle segment reflected substantial year-on-year declines in 2020. Extra-heavy commercial vehicle exports declined by 183 units, or 39,2%, from 467 units in 2019 to 284 units in 2020; heavy commercial vehicle exports declined by 61 units, or 34,1%, from 179 units in 2019 to 118 units in 2020; medium commercial vehicle exports increased by 26 units, or 23,0 %, from 113 units in 2019 to 139 units in 2020; while bus exports fell by 51 units, or 75,0%, from 68 units in 2019 to 17 units in 2020.

A large number of companies are active in the South African market, and in 2020, the following medium, heavy and extra-heavy commercial vehicle companies were represented in the country:

Babcock	Iveco
Bell Equipment	JMC
Daimler Trucks and	MAN
Buses Southern Africa	Peugeot Citroen SA
(Freightliner and Fuso	Powerstar SA
FAW Trucks	Scania
Fiat Chrysler	Tata Trucks
Automobiles SA	Toyota (Hino)
Ford Motor Company	UD Trucks Southern Africa
Hyundai Automotive SA	VECH South Africa
Isuzu Motors SA	Volkswagen Group SA
	Volvo Group Southern Africa

In 2020, the following bus companies were represented in South Africa:

Isuzu Motors SA
Iveco
MAN
MarcoPolo
Mercedes-Benz
Scania
Tata
Volvo Group Southern Africa

The following table reveals that the main export destinations for trucks and buses have consistently been South Africa's neighbouring countries in the Southern African Development Community (SADC) region, which is a free trade area. Zimbabwe was the overall top destination for all truck and bus exports in 2020, this included extra-heavy commercial vehicles and heavy commercial vehicles. The top destination for the exports of medium commercial vehicles was Mozambique, and Kenya was the top destination for buses.

Top destinations and region for medium, heavy commercial vehicles and buses exported – 2016 to 2020

Regional market development is a key pillar of the SAAM 2021-2035 to achieve higher vehicle production volumes via exports in future. The implementation of the African Continental Free Trade Area (AfCFTA) on 1 January 2021 could assist the expansion of the domestic industry's export into Africa to the large economies in West Africa and the fast-growing economies in East Africa.

AUTOMOTIVE COMPONENTS – EXPORTS BY PRODUCT

The automotive component sector in South Africa consists of a diverse group of various tier-level automotive suppliers. There are 187 first-tier suppliers, of which about 75% are foreign multinational companies. A distinct diverse range of original equipment components and aftermarket parts are manufactured in South Africa. The bulk of the domestically manufactured automotive components are sold as original equipment components to the OEMs, or as replacement parts. Domestic component suppliers' turnover sales in 2020 amounted to R78 billion, of which nearly half went to the OEMs and the balance to exports and the aftermarket. Key pillars of the SAAM 2021-2035 in the achievement of its objectives relating to supplier development include localisation, industry transformation and the development of industry-required technologies and skills. Well trained and skilled employees are critical for the long-term success of a business.

Top automotive component exports by value – 2020 (R million)

Source: AIEC, SARS

The following table reveals the automotive component export ranking by product category from 2016 through to 2020. In 2020, automotive component exports increased by 1,5% to a record R54,5 billion, from R53,7 billion in 2019. Catalytic converters reflected a substantial increase in exports year-on-year in 2020, despite the Covid-19 impact on global markets, and comprised 47,7% of total automotive component exports, followed by engine parts, tyres and radiators.

Automotive component export ranking by product category – 2016 to 2020

Component category	2016	2017	2018	2019	2020	% of total export value	Ranking
Total (R million)	53 041	50 275	51 296	53 667	54 476

Source: AIEC, SARS

The following tables reveal the Product/Market Matrix for the top 10 destinations for the automotive product category exports from South Africa from 2016 through to 2020. Considering South Africa's geographic location, the focus of exporters tends to be on high-value domestically beneficiated, logistics-friendly automotive components. The country's manufacturing capabilities are illustrated by the fact that the EA111 engine for the VW Polo and Polo Vivo, as well as the Duratorq TDCi turbodiesel engine for the Ford Ranger, Ford Raptor and Ford Everest sports-utility vehicle, both linked to export programmes, are manufactured in South Africa. The export values of the latest year (2020) in R million are used to rank the component categories in order of priority and for each component category from the most to the least important export country destination. Growth markets are reflected in green in those instances where there was a **5 or more percentage point growth** in exports over the past five years.

AUTOMOTIVE COMPONENTS – EXPORTS BY COUNTRY

The following table reveals that the main destinations for automotive component exports remain first world markets. Germany has remained the South African automotive industry's top export destination for component exports over the past three decades. However, continuous diversification, as well as the substantial increases year-on-year in exports to markets such as the Czech Republic, Mexico and Turkey in 2020 are underscoring South Africa's increasing status as a global player. As one of the key pillars of the SAAM 2021-2035, the implementation of the AfCFTA will create the platform for South African automotive manufacturers to drive a strong regionalisation strategy in Africa.

The following tables reveal the automotive export details for the 116 export destinations recording an export value above R10 million in 2020. Vehicle production and vehicle sales for 2020, obtained from the International Organisation of Motor Vehicle Manufacturers (OICA), have been included for the respective countries, where applicable. Relative high-volume light and heavy commercial vehicle exports of South African manufactured vehicles have also been included in order to identify associated replacement parts exports to the respective countries. Export categories for which the export values **more than doubled** from 2016 to 2020 have been highlighted in green in the following tables.

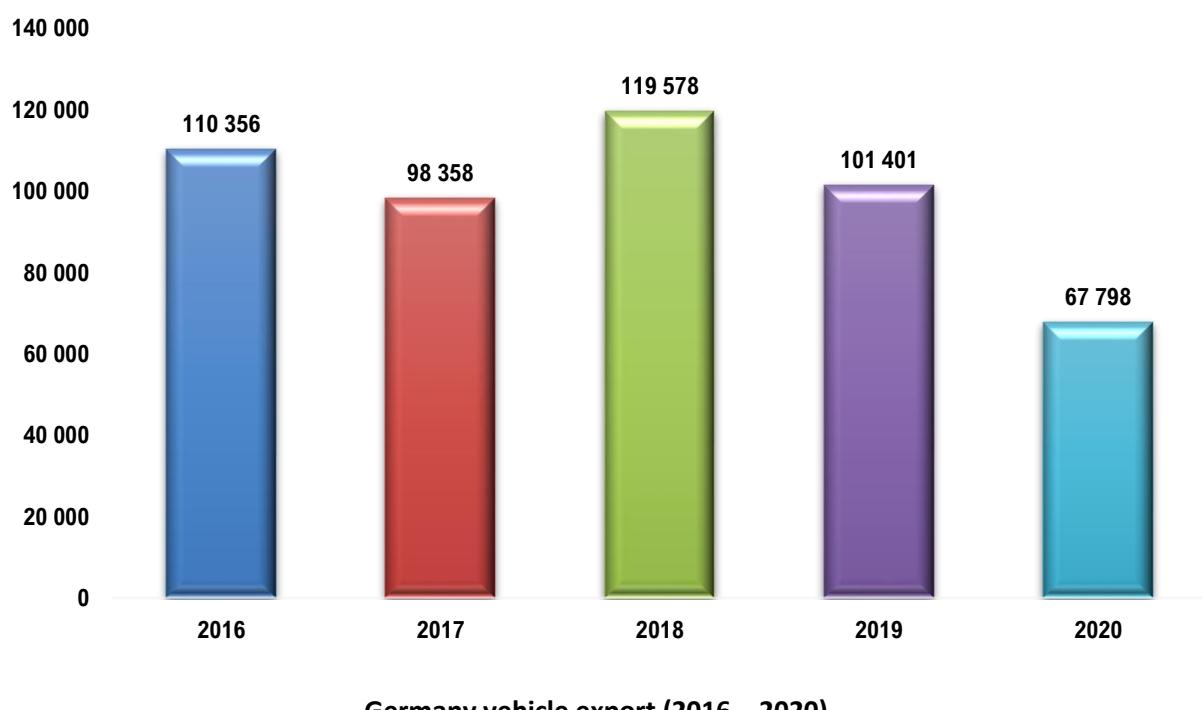

1. GERMANY (Left-hand drive)
(Vehicle production 2020 – 3 742 454 units) (Vehicle sales 2020 – 3 268 222 units)

Standard disclaimer

The trade data is based on eligible APDP products. The AIEC cannot vouch for the accuracy of the information obtained from the sources. Due to certain limitations, Customs and Excise statistics cannot always distinguish between automotive components eligible in terms of the APDP and non-APDP components. The main purpose of this trade data is to discern trends in exports and export destinations, as well as imports and countries of origin.
